Sale Commences 7.00pm

Bidding ringside & online via the Marteye App

The West of Ireland Registered Pedigree Suffolk Sheep Breeders Club was established in 1971, proudly celebrating its 50th Anniversary in 2021. Over the years, member flocks have invested heavily in high-profile service sires and the introduction of elite female bloodlines, focusing on both quality and **performance**. Many of our breeders' stock have gone on to become **winners in the showring**, earning National and Provincial titles and cementing the Club's reputation for excellence.

The strong demand for rams produced by our members is a testament to the superior **genetics** and consistent **performance** of their flocks, evident at every annual sale.

This year, we are delighted to offer for sale a select group of in-lamb shearlings and ewe lambs, from some of the top Suffolk breeders in the West of Ireland. These animals represent some of the finest **elite genetics** available to breeders in Ireland today.

This sale offers an ideal opportunity for aspiring Pedigree Suffolk breeders to acquire high-quality foundation stock, and for established flocks to enhance their breeding programs with proven **performance** and **showring-winning** bloodlines.

We would like to extend our sincere thanks to **Athenry Mart** for facilitating this sale, to our generous sponsors, and especially to our loyal buyers and supporters who champion our breeders throughout the year.

€uroStar Evaluation Explanation Page

Important: Information in this catalogue is provided for or by the breeder, who is solely responsible for its accuracy—not Sheep Ireland

Evaluations should not be the only selection tool you use—animals must also be physically assessed (e.g. mouth, feet). Physical faults cannot be offset by strong evaluations and should be avoided in breeding..
See below how to interpret the €uroStar catalogue.

★★★★★

€uroStars – How to interpret them

- Each star represents where the animal ranks on each index in 20% bounds
- ★ Represents the **bottom 20%** of the breed for that trait
- ★★★★★ represents the **top 20%** of the breed for that trait
- Higher stars = Higher predicted profitability €

☆☆☆☆☆

Animals that only have the outline of a star represent animals that have within flock evaluations, this means the star rating of these animals cannot be compared to any other animals from a different flock.

Rank

- This figure shows where an animal ranks within its breed in 20% bands—for example, “Top 20%” corresponds to five stars, while “Top 21%” corresponds to four stars (see example below

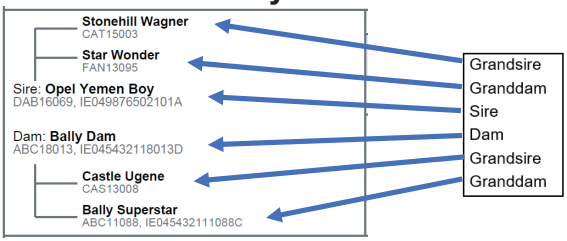

Acc% (Accuracy%)

- Accuracy indicates the amount of data behind each evaluation. Where Acc% is low, much less emphasis should be placed on the evaluation, and vice versa. Acc% is displayed for the Replacement and Terminal Index, e.g. Acc 87%

Ancestry Information

Interpreting the Indexes and Traits

1) Replacement (€3.44) – Used to select rams for breeding both replacement females and slaughter lambs; This index combines survival, growth, fertility and milk traits. € value reflects **profit per lamb**, comparable across breeds.

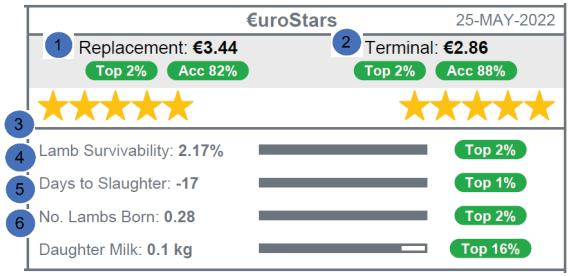

2) Terminal (€2.86) – Used to select rams for producing slaughter lambs; focuses mainly on survival and growth traits of progeny. € value reflects **profit per lamb**, comparable across breeds.

3) Lamb Survivability – Ranks animals based on lambing ease and lamb survival rate. Every positive % point on this index is an extra lamb surviving past 48hrs.

4) Days to Slaughter – Ranks animals on their genetic ability to grow. Fewer days indicates faster finishing to target weight.

5) No. of Lambs Born – Ranks animals based on the predicted prolificacy of the females from this animal compared with other animals of the same breed.

6) Daughters Milk – Ranks animals based on the predicted milking performance of their daughters compared with other animals of the same breed.
